REPLY TO 371 FORMALITIES LETTER REGARDING SEQUENCES

Sir:

This communication letter responds to the formalities letter mailed on 2 June 2006, setting a two-month period for response. As this reply is filed within the period set in the letter, it is timely.

The formalities letter states that the application fails to comply with the requirements of 37 C.F.R. § 1.821 et seq. regarding nucleotide and amino acid sequences. However, the application does not contain any sequences within the meaning of those rules.

Figure 8 illustrates mutations at isolated residues in a gene that is represented diagrammatically. No sequences of nucleotides or amino acids are set forth. Figure 9 is a listing of genetic loci (i.e., names of genes). No nucleotide or amino acid sequences per se are illustrated. No sequences appear elsewhere in the application.

Because the patent application does not set forth any nucleotide or amino acid sequences, no sequence listing in hard-copy or computer-readable form is required under 37 C.F.R. § 1.821 et seq. Applicant notes that the same issue was raised by and resolved before the ISA/US during the international phase of this application.

Serial no. 10/552,665

Attorney Docket no. 22966-81050

Conclusion

Applicant submits that "Notification to Comply ..." was issued in error and accordingly requests that the Office vacate the requirements set forth in the formalities letter.

Respectfully submitted,

David L. Fitzgerald, Reg. No. 47,347
